

Member of UNEP FI

The UNEP Finance Initiative

For NORD/LB, sustainability also means to act in accordance with high principles and internationally recognised standards. We have therefore joined among other things the United Nations Environment Programme Finance Initiative (UNEP FI). The UNEP FI is a global partnership of banks, insurance companies and asset-management companies which are pursuing the integration of sustainability in the financial sector with this initiative.

By signing the UNEP Statement of Commitment by Financial Institutions, the signatories recognise the interaction between the economy, environment and society and make a commitment to contribute towards the sustainable development of the economy and society. This voluntary commitment involves:

- a commitment to sustainable development
- the promotion of forward-looking environmental management
- open communication with the public about the promotion of environmental aspects.

More information about the UNEP Statement of Commitment by Financial Institutions and the UNEP Finance Initiative can be found at the following link:
